

Bruno Electra-Ride™ III

Custom Curved Rail Stairlifts

*Turning
Houses...
Back Into
Homes!*

 **BRUNO®**
for your independence

Superior Styling

Your home's lovely curved staircase was once a highlight. Now, it's become a challenge. Bruno's Custom Curved Rail Stairlifts restore the function of your staircase for everyone, in beautiful, graceful style.

Refinement

This is the benchmark for stairlift design and operation. The Electra-Ride III, Model CRE-2110, encompasses all the technological advances and aesthetic considerations in one magnificent stairlift. Using two 12-volt batteries which are powered by a battery charger that plugs into any household outlet, the Electra-Ride III provides uninterrupted access up and down the stairway, even if your home experiences a power outage.

Convenient Installation

The Electra-Ride III is delivered fully equipped and ready for installation. The unit anchors to the steps, not the wall, and the stairlift rail can be placed as close as 7 inches from the wall. When the chair's seat, footrest and arm rests are folded, there is plenty of room for family and guests to use the staircase unimpeded.

Bruno's wireless call/send system allows for faster and cleaner installations. Your custom designed rail has been assembled and tested extensively at Bruno's manufacturing facilities, ensuring a perfect fit in your home.

When the Electra-Ride III is in the folded position, with seat, footrest and arm rests raised, there is plenty of room for family and guests to use the stairway.

The simple, unique design of the rail hides all mechanical components, and installation requires no modification to your staircase.

Electra-RideTM III

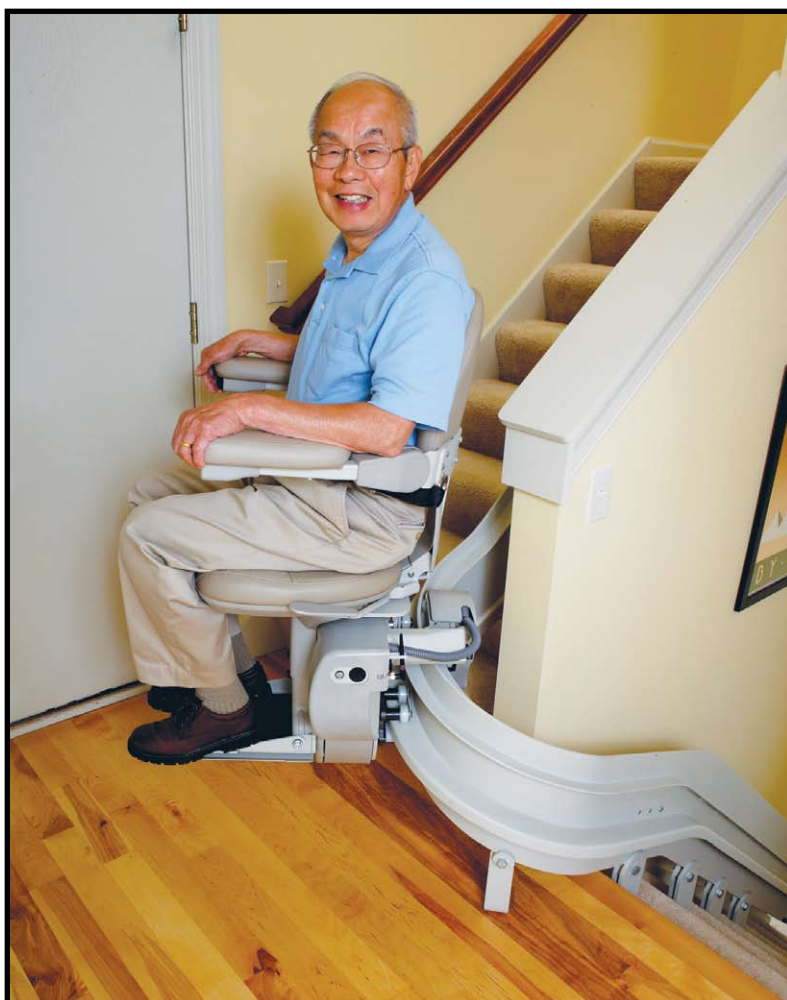

Quality Craftsmanship

Smooth & Stable

The Electra-Ride III delivers an effortless ride with subtle power and remarkable stability over any stairway configuration. Its strong, resilient drive system provides the safest operation and longest lasting durability for years to come, even when carrying a maximum load of 400 lbs. And, the soft-start, soft-stop, solid state controller features a secure, comfortable ride.

Designed for You!

Every aspect of the Electra-Ride III is a work of art. The seat, with upholstery selections, and carriage, incorporates everything Bruno has learned in the creation of the world's most comfortable, reliable stairlifts. The elegant, curved rail is produced by experienced craftsmen from exact measurements of your staircase. No two stairlifts are alike. Only the quality is consistent.

Electra-Ride III Features

The new offset swivel seat makes the entry and exit position at the top landing safer and easier than ever!

The footrest and carriage safety sensors safely stop you, even if the slightest obstacle is in the way while you ride!

RAIL OPTION:
The CRE-2110 can be equipped with an optional top or bottom park to facilitate an exit and remove the unit from the stairs.

The two wireless call/send controls make installation simple and clean with no wires running along the wall.

Electra-Ride™ III

Electra-Ride™ III CRE-2110 Specifications

Exceptional Value

- ◆ Locking swivel seat
- ◆ Two remote, wireless call/send controls
- ◆ Generous seat size – 17.75 in (451 mm) adjustable to 21.75 in (552 mm) between the arms
