

# Rise450

System **RoMedic**

RoMedic's philosophy is simple.

We love to develop and manufacture assistive devices that make life easier for both patients and personnel in the care sector.

System RoMedic comprises four product areas that meet most needs in different transfer situations.

**Transfer:** products for moving patients between locations.

**Positioning:** products for repositioning in the same location.

**Support:** products that provide mobility support.

**Lifting:** products adapted for lifting.

Our vision, to help people, has always been the driving force of innovation.

We love easy transfers.

# Rise450

The Rise450 ceiling track hoist has been developed, for use in combination with the correct lifting accessories, for convenient patient transfer of patients up to 450 lbs/205 kg. between two locations. Rise450 is installed on an appropriate rail system to cover lifting and transfer needs. The track system can include curves and switches, as well as a traverse system. This also enables convenient transfer of the patient between two rooms. There are two versions of the Rise450:

- Rise450M is delivered without powered traverse.
- Rise450T is delivered with powered traverse, which takes the hoist unit to the parking position for automatic charging.

Disengagement of the traverse motor on the Rise450T

The display includes:  
-Cycle counter  
-Remaining batteri capacity  
-Time for service

Max load 450lbs/205kg

Mechanical and electrical emergency lowering

Visible emergency stop

Strap feeding prevents accidental twisting of the lift strap

### Technical information:

Lifting capacity: \_\_\_\_\_ 450lbs, 205kg  
Lifting range: \_\_\_\_\_ 95.16 inch, 2440 mm  
Lifting speed: \_\_\_\_\_ 1.4 inch./s. 35 mm/s without load  
Lift measurements: \_ 12x8x5.6 inch, 310x200x140 mm  
Motor chassis: \_\_\_\_\_ Flame-resistant ABS plastic  
Emergency lowering: \_\_\_\_\_ Mechanical and electrical  
Lift weight: \_\_\_\_\_ 21-23.2 lbs, 9.5-10.5 kg

## Accessories

### Slings

RoMedic slings are available in different fabrics and models. The choice of model and material is determined by the patient's functional capacity and the situations in which the product is to be used. For further information on slings and other lifting accessories, see RoMedic's manuals and brochures. Positioning aids: TopSheet, SafeHandlingSheet, RoMedicClips
