A Class Above The Rest

Level Up Elevator & Lifts empowers homeowners to craft their dream elevator – blending world-class engineering with fast, modular installation. Built to perform. Styled to inspire. Our self-supporting elevators seamlessly fuse proven lift technology with panoramic beauty, delivering a lifetime of modern luxury.

Proudly made in the USA and backed by over 50 years of industry expertise, Level Up offers high-quality engineering in a quick-to-install design — delivering one of the most attractive, fully certified residential elevators available worldwide.

Juan de Ledebur

Founder & CEO - Level Up Elevator & Lifts

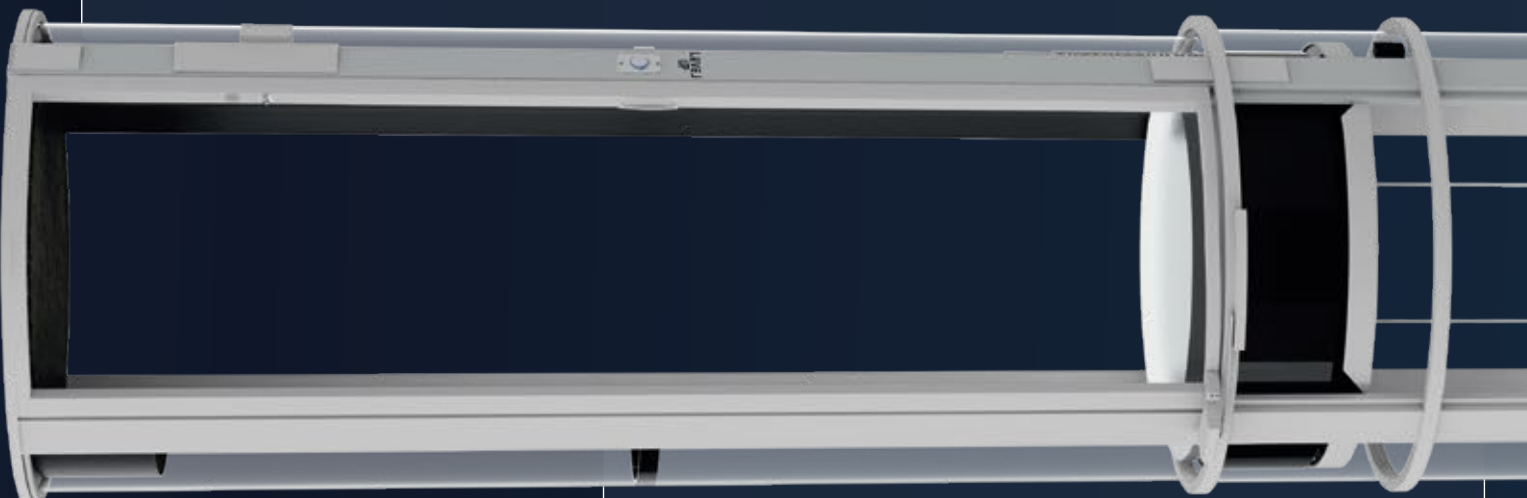

Sleek & Dependable

Designed with 360° panoramic views, our residential elevators combine contemporary aesthetics with proven performance. Dual winding drums deliver smooth, stable motion with a whisper quiet drive system. The result is elevated beauty paired with trusted engineering - allowing you to travel gracefully between floors in style and comfort.

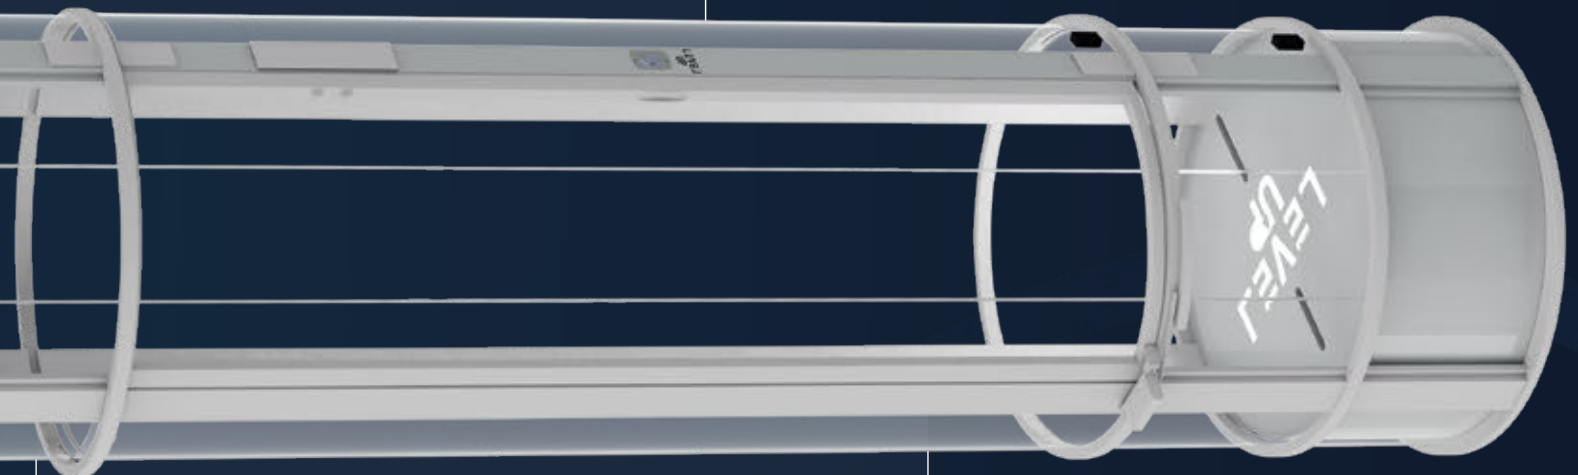

Model: SQ200 | Color: Black

Freedom Through Masterful Design

Custom-built for every home, our handcrafted elevators deliver both independence and convenience. Gracefully positioned at ground level – with no traditional shaft or pit required – these elevators offer a compact footprint that saves valuable space inside your home. Experience a self-supporting elevator that enables effortless installation and limitless design possibilities.

Model: CY300 | Color: White

Absolute Safety Without Compromise

Proudly manufactured in Miami, Florida USA, every Level Up elevator is crafted to the highest safety and quality standards. Each unit is pre-assembled and expertly tested at our factory prior to shipping, ensuring premium performance upon installation.

Fully certified to A17.1 residential elevator standards, every model features a battery backup system—allowing the cabin to complete its travel even during a power outage and giving you complete confidence in every ride.

Quick-to-Install. Elegance Uninterrupted.

A Home Lift Solution Tailored To Your Needs

Select a signature class, then choose your series.
Personalize your modern lift with Level Up.

Select Your Class 01 --

Step One

Two elevator classes. One bold statement. Select the class that fits your lifestyle and complements your home's character.

02

Choose Your Series

Step Two

Whether you need a space-saving solution, or wheelchair accessibility, each series offers unmatched quality with various passenger capacity options.

Choose

200 Series

2 passengers

500 lb lift capacity

Available for CY & SQ Classes

Available for both CY & SQ Classes, the 200 Series offers space-saving convenience without compromising on style. Sizes vary by class. Ideal for walkers and full-size luggage. Comfortably transport two passengers – elevating your home while maximizing space.

Choose

300 Series

3 passengers

825 lb lift capacity

Available for CY Class

Wheelchair Accessible*

Currently available for the CY Class, the 300 Series is our largest and most spacious option – designed for comfort, functionality and accessibility. Wheelchair accessible* and capable of lifting up to three passengers, enjoy an expansive solution crafted for refined living.

*300 Series by Level Up is not ADA compliant and is not permitted for commercial applications. Due to its compact design, not all wheelchairs may fit inside the elevator cabin. Please consult with your local authorized dealer to confirm.

Model: CY300 | Color: Custom Color

08

03

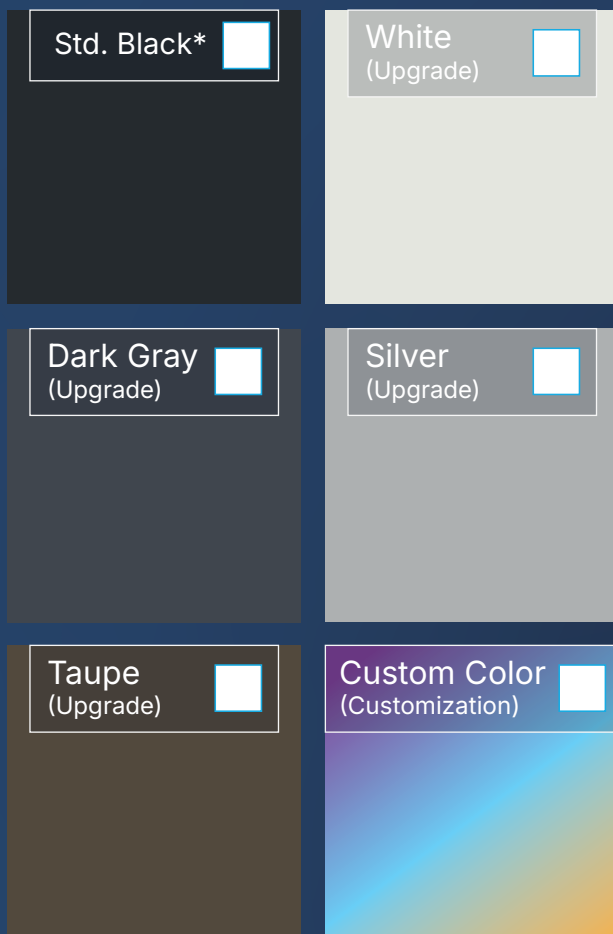

Design Your Lift

Step Three

Customize your elevator with Level Up's latest options and upgrades.

Color Options

Powder coated finishes available for the exterior frame of your home elevator.

*Standard Black is the base color option included with every Level Up order.

Options & Upgrades

Explore the options & upgrades to craft your ideal home elevator solution.

- Total Rise: 38 ft

*300 Series by Level Up is not ADA compliant and is not permitted for commercial applications. Due to its compact design, not all wheelchairs may fit inside the elevator cabin. Please consult with your local authorized dealer to confirm.

Install Applications

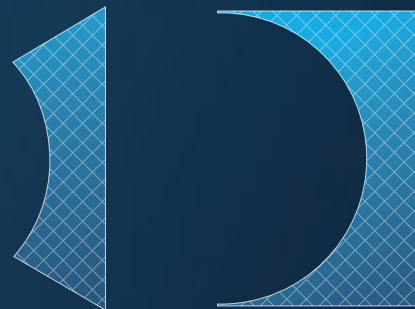

BALCONY APPLICATION

Used when the elevator is installed in an open space, double-height area, indoor mezzanine, or stairwell. For balcony installations using the CY Class (Cylinder Design), a landing, platform, or walkway (not provided) must be constructed at the upper level — or a half-moon opening embedded into the existing balcony. Mounting brackets provided secure the elevator to the landing.

It is recommended that the finished landing depth, at its widest point, be 1/2 inch greater than the exterior diameter of the elevator model.

TYPES OF LANDINGS*

Different configurations for a Walkway or Platform.

*Landings are not provided by Level Up and must be custom-built by others for each project.

THROUGH-FLOOR APPLICATION

A finished floor opening is required at each stop, with a diameter 2 inches greater than the elevator's exterior dimension. For elevators with three or four stops, all through-floor openings must be precisely aligned from top to bottom.
